

PicoWay®
INTENTIONALLY BRILLIANT™

Remove Boldly.
Treat Lightly.

PicoWay®
INTENTIONALLY BRILLIANT™

PicoWay® is a picosecond laser treatment that works below the surface to transform skin.

Whether you have acne scars, wrinkles, dark skin spots or even tattoos you would like to remove, PicoWay can treat them all. Ask your doctor if *PicoWay* or *PicoWay Resolve* is right for you.

Treat Your Skin

And Yourself

PicoWay®
INTENTIONALLY BRILLIANT™

From The Inside Out.

ACNE SCARS

Acne scars are a common condition that can result from deficiencies in collagen. PicoWay Resolve treats acne scars below the surface, without breaking the outer layer of skin, the epidermis.

DARK SPOTS

Dark spots on skin, known as benign pigmented lesions, are common. They include freckles, café au lait spots and hyperpigmentation. PicoWay targets the pigment below the skin and breaks it into minuscule particles which then fade.

WRINKLES

PicoWay Resolve offers an option to treat wrinkles with low to no downtime. Treatments are done over a series of brief 15-20 minute sessions.

TATTOO REMOVAL

PicoWay is a gold standard in multicolor tattoo removal, removing even the most difficult colors, blue and green ink. PicoWay has the shortest pulses, which breaks tattoo ink under the skin's surface into tiny particles, minimizing the appearance of the tattoo over time.
